I am William Francis Gomes from Bangladesh. I am working as Software Engineer for nearly 4 years. I am expert in PHP, MySQL, ASP.Net, MS SQL, HTML, CSS and also Ajax & jQuery. During this 4 years i have completed so many web-based online applications and dynamic websites. Some of my best developments are Online Order Management System, Medical Inventory, Accounting Software and Custom-made eCommerce framework etc. I am also expert in PHP MVC Frameworks like Cakephp, Codeigniter, Zend, Laravel. I am experienced in Java and Android App.s Development.

I believe in perfect things. To me client is everything. I always try to keep my clients happy using my skills and experience. I am so much confident in PHP that i believe that i can make anything out of nothing. During these 4 years, i have been worked as a dedicated Software Engineer.

Combining my experiences, academic studies, and outside interests, I feel I bring a positive and rounded perspective to software engineering, ultimately one that will be desirable and necessary in the increasingly important world of software engineering.

Education & experience aside, I have varied interests which include, playing games, socializing and going out with family and friends on a regular basis.

So why me? I am a very fast learner, like to learn new things when ever possible. Also i am very fond of new technologies and stuffs. I am a very keen at problem solving and brain storming. When it comes to engineering, i always try to think two to three steps ahead. Would love to work in a team of crazy people around. Most of all, will always try to give me best out of me.

Technical Skills

Like: php, mysql, sql-server, asp.net, sql, linux, redhat, zend-framework, zend-framework2, laravel-4, codeigniter, cakephp, model-view-controller, android, java, ajax, json, javascript, symfony2, python, ruby, angularjs, node.js, backbone.js, kendo-ui

Dislike: wordpress, joomla

Tools

First Computer: Mac G4
Favorite Editor: Netbeans

Background

I am a very friendly and open-minded person. I am in great love with computers. Also i love to eat codes. I worked in Linux & Windows OS. Would love to work in a Mac. Its kinda my dream to do regular work and development in a highly configured Mac.

I dont like someone talking on my head like "You missing deadlines" or "We have to work hard." type talkings always. If so, my mind wont work as it should. I guess everyone is same. But when it comes to maintaining deadline, i would do anything for it.

Everybody is unique and have some unique capabilities. I think my unique capability is toughest problems dont bend me. Somehow i come through them in one piece. As like wise saying "Problem always finds its solution". To me, every problem have one or more solutions.
